EXPERIENCE

Laravel Developer and Vue.JS/React.JS
Jul 2022 - Sep 2022

BLENDIT(Internship)

During my internship, I worked on backend development using the Laravel framework, focusing on optimizing application performance and ensuring efficient data handling. Additionally, I contributed to a full-stack web application project that integrated Vue.js and React.js for the front end and Laravel for the back end. This project enhanced my expertise in modern web development and provided hands-on experience in building scalable and maintainable applications. I also gained experience with Git for version control and CI/CD pipelines to automate testing and deployment.

Freelancer - React.js / Laravel / Next.js
Sep 2023 - Jul 2024

As a freelance developer, I have worked on various projects utilizing React.js to build responsive and dynamic user interfaces, combined with Laravel for powerful back-end development. I also integrated Next.js for server-side rendering and improved performance in some projects. These experiences involved creating and deploying feature-rich applications, ensuring seamless API integration, and delivering high-quality, client-focused solutions. Working as a freelancer has strengthened my problem-solving skills, ability to work independently, and adaptability to different project requirements. I also leveraged Git for version control and CI/CD workflows to streamline development and deployment processes.

Frontend Developer - Zongha Technology (React.js, Next.js, React Native)
July 2024 - Present

At Zongha Software Solutions, a startup company, I focused on front-end development using React.js and Next.js to create engaging and user-friendly interfaces for web applications. My responsibilities included designing and implementing responsive components, collaborating with designers and back-end developers, and ensuring optimal performance across different devices and browsers. Additionally, I worked with React Native to develop cross-platform mobile applications, enhancing the mobile experience and ensuring seamless integration with web solutions. This role allowed me to further refine my front-end skills, particularly in state management, component-based architecture, and performance optimization.

EDUCATION

Primary (Elementary)   *2006 - 2013*
Sierra Bullones Central Elementary School

Junior High School   *2013 - 2017*
Sierra Bullones Technical Vocational High School

Senior High School (ICT)   *2017 - 2019*
Sierra Bullones Technical Vocational High School

College: BS in Computer Science   *2019 - 2023*
Bohol Island State University – Bilar Campus

TECHNICAL SKILLS

React.JS	Git	CodeIgniter
Laravel	GitHub	Bootstrap
Vue.JS	C#	REST API
HTML	Next.js	MySQL
CSS	Node.js	AWS
JavaScript	CI/CD Tools	AJAX
TypeScript	Figma	Linux
PHP	Docker	MongoDB
Tailwind CSS	React Native
